Additional copies \$15.00 each

NOTES & TIPS:

- All the above prices include VHS tape or DVD-R disc.
- For Hi 8, S-VHS, or Digital tape, add \$10. Per order.
- A two hour VHS or DVD-R will hold about 1800 ft. of film. 1000 ft. regular film runs 74 minutes and super 8 runs 67 minutes.
- Most film reels have the number of feet marked along one spoke of the film reel.
- The small reels (80mm or 3 1/2") contain 50ft. if full.
- The best interval for viewing slides and photos is 6 seconds. This gives you 10 images a minute, 600 per hour.
- When submitting your materials for transferring, films, slides and photos should all be clearly marked in the order they are to be shown, and all title printed clearly. Slides (if not in trays) and photos, should be banded in groups of 25.
- We dust all slides where needed and each slide or photo is exposure compensated and color corrected. Composition is also improved if necessary.
- **MUSIC AND TEXT**
- Text (titles) can be a maximum of 21 characters and spaces combined per line. 11 lines maximum per screen. Music is for continuous underscoring of songs. If certain images or groups of images are to accompany specific music, additional editing charges may apply.
- Multi media videos combining film, slides, photos, music and special effects require more setup and editing time. Accordingly, they are priced by the individual finished production. Your dealer will be glad to arrange a consultation and price quote.
- **NOTE: DVD-R MEDIA MAY NOT BE COMPATIBLE WITH SOME OLDER FIRST GENERATION PLAYERS.**
